PROFILE

Junior Frontend Developer with experience in academic and personal projects using React, JavaScript, HTML, and CSS. Passionate about designing modern interfaces and user experience, with knowledge in consuming REST APIs, responsive development, and agile methodologies (Scrum/Kanban). I have a foundation in Python and Django, enabling me to contribute to full-stack projects. I am seeking remote opportunities where I can continue to grow and provide creative solutions.

PROFESSIONAL EXPERIENCE

RM Tesis - Arequipa, Peru
Web Developer | September 2023 - November 2023

- Developed responsive user interfaces using HTML and CSS.
- Implemented improvements in usability and accessibility.
- Collaborated with the team to optimize the user experience.

Chucuito District Municipality - Puno, Chucuito, Peru
Web Developer | November 2023 - April 2024

- Maintained the municipality's websites.
- Implemented improvements in usability and accessibility.
- Collaborated with the team to optimize the user experience.

ACADEMIC EXPERIENCE

E-commerce for Digital Marketing Company (Python, Django, PostgreSQL)

- Developed a web application with user authentication and product management.
- Implemented a REST API with Django and deployed on Heroku.

Referral System for Healthcare Center (Java, MySQL)

- Developed a medical referral management system with secure data storage and PDF report generation.

Web Query System for Real Estate (JavaScript, C#)

- Developed a platform for property management, integrating Google Maps and user authentication.

Mobile Application for Educational Psychological Support (Unity, C#, Python, MySQL)

- Developed a mobile application to support psychological diagnosis for high school students.
- Created APIs for integrating generative AI and database connectivity in Unity.

PERSONAL
PROJECTS

MovieApp (React, REST API, React Router)

- Application that consumes a movie API, displays a list of movies, and allows viewing details upon clicking.

Jobs Developer (React, Tailwind, Filters)

- Platform that lists job openings and enables filtering by contract type and location.

Pokédex (React, PokéAPI)

- Application that consumes the Pokémon API to display characters with detailed information.
-
